

# Feature Details

**Feature Id 158**

**Project Gallery Server Pro**

**Name Allow administrator to disable the ability for users to delete their own account**

**Build #** 2.3.3439

**Start Date** 5/27/2009

**Priority** Low

**Estimated Work** 1 hrs

**Due Date**

**Status** Closed

**Actual Work** 30 min

**Completion Date** 5/28/2009

**Percent Complete** 100

**Requested By** Roger Martin

**Assigned To** Roger Martin

## Description

In 2.3 a new option was added to the My account page where a user could delete their own account. An administrator may not wish to allow this behavior, so add an option to prevent it.

## Notes

Added configuration setting allowDeleteOwnAccount to galleryserverpro.config and used its value to determine whether to enable this function on the My account page. Exposed setting to administrators on the User Settings page in the Site Admin area.

**Feature Id 159**

**Project Gallery Server Pro**

**Name Performance improvement: Faster page loading for administrators when there are lots of user accounts**

**Build #** 2.3.3439

**Start Date** 5/26/2009

**Priority** High

**Estimated Work** 2 hrs

**Due Date** 5/29/2009

**Status** Closed

**Actual Work** 4 hrs

**Completion Date** 5/29/2009

**Percent Complete** 100

**Requested By** Roger Martin

**Assigned To** Roger Martin

## Description

The edit album popup window displays a list of users to allow an administrator to assign an album owner. These users are downloaded for every page load, even though most of the time they are never used. It would be better to load them on demand.

## Notes

The ComboBox in Website\gs\controls\albumedittemplate.ascx was modified to perform on-demand loading. It is initially populated with 15 users. When the user opens the dropdown and either begins typing or scrolls down, an AJAX request fetches up to 100 user names at a time.
